Benefits and Common Uses of 10 ft Shipping Containers

- Extra Small Shipping Container Size Fits Almost Anywhere
- Great way to store or move personal items
- Ground level containers makes it easy to climb in-and-out safely
- Lock up construction tools and small property items
- Keep your materials out of the weather elements
- Portable and relocatable to adapt to your site easily
- Make great personal sheds for yard work tools and gardening storage

What fits in a 10 Foot Shipping Container?

10 ft. metal shipping containers are one of the more rare and unique shipping container sizes. When available, they can offer an excellent storage solution for spaces where the more common 20' and 40' options can't fit or aren't needed.

Floor Space	80sqft	80sqft
Weight	2800lbs	3100lbs

How Much Does A Shipping Container Cost?

Used 10' containers are made from used 20' foot containers that have been cut in half into two 10 ft units. Whereas new 10' containers are made from specially designed Duocon 20' containers that are designed to be cut in half. The new one trip 10' containers made from a 20' Duocon will have corner castings at all 8 corners and they will all come with a set of double doors at one end. See Duocon 20' and 40' for more details...
